<b>Office Action Summary</b>	<b>Application No.</b> 10/565,443	<b>Applicant(s)</b> GLOOR, ARNOLD	
	<b>Examiner</b> HERBERT J. LILLING	<b>Art Unit</b> 1657	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 1-20-2006 (Prelim Amd & IDS).
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. Receipt is acknowledged preliminary amendment and a prior art information disclosure statements filed January 20, 2006 for this application which is a 371 of PCT/EP04/08097 filed July 20, 2004 which claims benefit to EPO 03016512.0 filed July 22, 2003..

2. Claims 1-20 are now pending in this application.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 and 13-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dale, U.S. 2,797,215.

Dale teaches the purification of riboflavin which steps includes the preparation of a first crystalline form that is converted into a second form of crystalline form at 95-98 deg C which is further dried which is presumed to be essentially anhydrous crystals. In addition, the process as disclosed indicates that seeding yields better results for the conversion see column 4, first full paragraph.

The reference does not disclose conditions whereby the transforming step contains undisclosed conditions, not present in the instant claims that decompose "diluted DNA".

It is presumed that the process conditions of the reference contain the requirement of decomposing diluted DNA absent a showing to the contrary.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

The reference teaches the purification of riboflavin from one crystalline form A B or C to a different crystalline form which includes conditions of employing seeding with a riboflavin crystalline form as well as temperature requirements as disclosed in the specification.

4. Claims 11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The reference does not disclose the process steps of heating in the range of 60 deg C and 75 deg C since the specific range in the reference is 95-98 deg C. The reference also does not teach or disclosure process step of claim 12.

5. **No claim is allowed.**

6. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
